CHANCERY LAND SALE

By virtue of a decree of the Chancery Court of Putnam County, Tennessee, in the case of Boss Hall vs. Lisa Wiser et al., on Saturday the 30th day of July, 1921 at the Court-house door in Cookeville, Tennessee I will sell to the highest bidder the following described property, to-wit: Lying and being in the 6th Civil District of Putnam County, Tennessee, and bounded as follows: On the north by Hick Reynolds, on the south by Rockwell, on the east by Jackson; and on the west by Langford and Tabor, and contains 200 acres more or less. Said land will be sold subject to the life estate of Eliza Wiser.

TERMS OF SALE: One-third cash and balance on one, two and three years time, and notes with good securities required; a lien retained for the purchase money.

W. R. CARLEN, Clerk and Master. This 27th day of June, 1921.

The world was a man only that which he is able to collect. Beauty is never skin deep. The other side wouldn't look at all attractive.

It isn't always the cost of a thing that bothers us. It is the price we have to pay.

What appears to be the essence of wisdom to one person may seem the rankest of folly to another.

It has been truthfully remarked by one who knows that there is more joy in a printing office over one sinner who pays in advance and cusses the editor on every occasion than over ninety and nine just persons who borrow the paper and sing its praises without contributing a cent to keep the publisher out of the poor house.—Exchange.

IT IS HARD TO BE ACCURATE.

Can you exactly describe what you see? If you can you are cleverer than most persons. A book recently published in Paris relates that at a meeting of scientific men two of them suddenly began to quarrel. Under pretense of obtaining legal evidence the president of the meeting asked every one present to write an exact report of what had happened. The quarrel was a pure piece of acting arranged to test the powers of observation of the men present.

Though the assembly was composed entirely of jurists, psychologists and doctors' only one report contained less than twenty per cent of error; thirteen reports had more than fifty per cent wrong; and in thirty-four reports from ten to fifteen per cent of the details were wholly imaginary. When men of science can so err we can understand how easily the ordinary man can go astray. The story shows why lawyers value circumstantial evidence so highly.

REAL MISSIONARY WORK

The message that better sires offer an effective way of obtaining better live stock of all kinds is to be carried into rural districts of the south by more than 5,000 county pastors.

In accordance with a request from the board of mission of the Methodist Episcopal Church, South, the United States Department of Agriculture has supplied the rural survey secretary of the board with the necessary information.

A stereopticon lecture based on a set of 70 lantern slides prepared by the Bureau of Animal Industry is to be used as a part of the work.

We feel that we can be of material assistance to you," the rural survey secretary of the board stated to the department, "in carrying your message to the people who need it most."

The good ministers tell us it is wrong to work on Sundays, but that is what we pay them to do.

Dear old congress is just itching to perpetrate another national joke. It wants to investigate war contracts.

BIG RALLY FOR THE SANATORIUM AT PLEASANT HILL

Saturday, June 25th the auditorium at the Pleasant Hill Academy was comfortably filled with people come together to learn more about the plans for the sanatorium that is contemplated for the village. Dr. May Wharton told her hopes for the institution and how it was planned to run it and what it could do for the people of Cumberland and surrounding counties. She told the audience that it was the intention to have one building for treatment of all general cases and for operations when that was necessary and another for treating tuberculosis patients. Costs were to be kept at the lowest practical figure so that all could get the benefit of treatment at the sanatorium. In addition to the treatment that will be given in the sanatorium lessons in sanitation and in keeping well will be given to the people of the community and from time to time to other communities by Dr. Wharton and probably later by others connected with the sanatorium.

The talk by Dr. May Wharton was followed by talks by Miss Fletcher, Miss Dodge, Mrs. Boyce, Mrs. Newton, Mr. Newton, Mr. Trainum, the new principal of Pleasant Hill Academy, Mr. Boyce, Mr. Marion Taylor of Taylor's Chapel, Mr. Dan Lundy and others. Everyone expressed himself heartily in sympathy with the movement and offered all of the support, financially and otherwise that he could give. There was no doubt in the minds of any speaker but that a sanatorium was needed up on the Plateau and Pleasant Hill with its splendid school seemed a logical place for the location of one.

It was explained in the talk by Dr. May Wharton and by other speakers that the sanatorium was to be built for the people and that money to build, equip and run it must be raised by voluntary subscriptions from individuals and corporations interested in the section. Funds must be raised to make the idea a reality, but every dollar spent will bring returns in relieving suffering and in bringing better health to the people who give the money and to all the surrounding country.

At the close of the meeting a committee was appointed to help Dr. May Wharton in raising funds and in perfecting plans for the sanatorium. This committee consisted of Mr. John Frey, Mr. Dan Lundy, Mr. Marion Taylor, Miss Fletcher, and Mr. L. R. Neel.

Meetings similar to the one at Pleasant Hill were planned for other communities to make it possible for the people to understand what the sanatorium was to do and to give people the opportunity of helping make it a reality. L. R. NEEL.

KEEP OPEN MINDED

Bathing in a bathtub, as late as 1846, was condemned as a corrupting luxury and denounced by the medical fraternity.

Air brakes were installed on trains only after the inventor had been called a "lunatic" when he first suggested the plan to a railroad president.

William Harvey, who discovered the circulation of blood, enjoyed a lucrative practice before he announced his discovery, but thereafter he was called "crack-brained" and trade fell off.

Daguerre, inventor of the daguerreotype was put in a asylum for saying he could transfer the likeness of human beings to a tin plate.

The Bavarian Royal College of Physicians claimed that railroads would ruin the health of the people because the rapid motion would give travelers brain disease.

SHIPMENT OF LIVE STOCK

Regulations governing the interstate movement of live stock, which become effective on and after July 1, 1921, and which supersede previous regulations on this subject, have been published by the United States Department of Agriculture. For purposes of identification these regulations are designated as B.A.I. (Bureau of Animal Industry) Order 273. The regulations published in the circular prescribe for the inspection, disinfection, certification, treatment, handling and method and manner of delivery and shipment of live stock which is subject to interstate commerce. The enforcement of the regulations is assigned to the Secretary of Agriculture by acts of congress. Their purpose is to control the interstate shipment of live stock and prevent the spread of diseases. Included in the publication are acts of congress relating to this subject, general provisions, and regulations to prevent the spread of the following diseases: Splenic Southern, or Texas fever in cattle; scabies in cattle and sheep; dourine in horses and asses; hog cholera and swine plague; and tuberculosis in cattle.

Isn't it about time the Republican party was redeeming some of its pledges made before the election? No one expected any immediate change, but four months is long enough to show whether or not these promises were sincere. The situation has grown gradually worse since the change of administration, and there is nothing to indicate a change for the better. —Sparta News.
